## Magika +plus

**System:**  
2 way Bass Reflex

**Cabinet:**  
Multipanel System - Structure laminated Birchwood - IRS Patent

**Tweeter:**  
29mm soft dome - Two part aluminium black faceplate with integrated mechanical decoupling

**Woofers:**  
5 1/2" radial reinforced low loss rubber

**Frequency Response:**  
38 Hz - 25.000 Hz

**Crossover point:**  
2.400 Hz

**Sensitivity:**  
87dB

**Nominal Impedance:**  
8ohm

**Power Handling:**  
30W-120W

**Finish:**  
Birch cabinet - beeswax surfaces

**Dimensions:**  
390 x 210 x 355 (HxWxD)

**Weight:**  
27kg pair

Magika +plus Loudspeaker

The Magika Plus is a high-end product from Audel, marking both a significant milestone and a new beginning. It's a global contender, reflecting the maturity and expertise of our designers and craftsmen.

Audel has always been known for its distinctive style and continuous evolution. Over the years, we've partnered with the best to offer top quality at a great price.

The Magika Plus stands proud, its transparent rear panel showcasing the quality of our choices. It features a tweeter with an independent decoupled flange for linear medium-high frequency behaviour, enhancing soundstage focus. The woofer has a reinforced membrane for fast, controlled, and deep bass. Our patented IRS EVO structure reduces resonances and stationary waves, ensuring audiophile quality. The speaker box is divided into three parts by an HPL slab to counter internal vibrations.

We use Solid Core wiring for a clear and transparent sound scene, and state-of-the-art crossover technology with DUELUND capacitors for amazing sound transparency, naturalness, and timbre precision.

Magika Plus is a testament to our past, a promise for our future, and a product of our passion. Entirely made in Italy with care and love.

With deep passion,

Walter Carzan
